Uni-CHEM® Bend Restrictor

A better way to move the tangent - flex point - away from the end of the coupling system.

- Long lasting ozone resistant EPDM rubber blend
- Uni-CHEM bend restrictors provide increased service life on hose connections.
- Reduced risk of premature hose wear due to kinking and hose fatigue at tangent point.

Hose in service; note the gradual bend achieved off of the horizontal connections

Hose coiled and placed on pallet; ready for shipment
